HTML

CSS

Javascript

Nodejs

Express js

Typescript

Mongodb

Mysql

python

Next.js

Tailwind CSS

Redux Toolkit

React

Talwindcss

Git

TypeScript

PERSONAL PROJECTS

Weather App

- Built a responsive weather application using **React** and **TanStack Query**, integrating the **OpenWeather API** to display real-time weather data including temperature, humidity, conditions, and sunrise time. Focused on efficient API handling, smooth user experience, and clean UI design.

Todo List

- Created an interactive to-do list application using **React**, allowing users to add, edit, and delete tasks. Implemented **localStorage** for persistent data storage, ensuring tasks remain saved even after page reloads. Focused on a clean UI and smooth user experience.

Currency Converter

- Developed a dynamic currency converter using **React**, allowing real-time currency conversion between multiple countries. Integrated a public exchange rate API for accurate and up-to-date conversion data, with a focus on clean UI and responsive design.

Resume Builder

- Developed a customizable **Resume Builder** using **React** and **TypeScript**, enabling users to create, edit, and download professional resumes. Focused on form validation, dynamic template rendering, and a clean, responsive user interface.

Attendance Management System

- Built a **full-stack Attendance Management System** with features like employee attendance tracking, late entry history, and an **admin panel** for management controls. Focused on backend functionality, data accuracy, and system reliability over UI design. Implemented secure authentication and efficient database integration.
